

SWITLIK 

Protecting Aviators Since 1920

The NEW **Modular Aircrew Life Vest** was designed as a base model life vest with optional pockets, holsters and accessories available to tailor the vest to customer needs. The unique looped webbing system allows the attachment of additional equipment specific to user requirements.

The adjustable torso webbing system provides a custom fit, while optional expansion panels give extended sizing capability. Overlapping panels eliminate underarm bunch, creating a flat, comfortable fit. The mesh vest front and back panels are completely breathable, eliminating bulk and excess heat, particularly important to comfort in warm conditions.

The new encapsulation cover has been redesigned for a clean, comfortable and secure low profile appearance. The Infinity Vest may comfortably be worn on an every day basis with shoulder and lap safety belts.
